

# Student's presentations

## List of presentations

N°	Student Name	Title of presentation
1	Michel Albonico	Elasticity Testing of Cloud Based Systems
2	Evgenii Vinarskii	FSM based tests' fault coverage for the gate-level circuit design
3	Jesus Moran	Software testing in MapReduce applications
4	Bruno Lima	Automated Scenario-based Testing of Distributed and Heterogeneous Systems
5	Ariadna Barinova	Strict Reasoning for the Versatile World
6	Sarah Dahab	An approach to measuring software systems using new combined metrics of complex test
7	Guillaume Voiron	Test generation using tri-modal abstraction
8	Oscar Cornejo	In the field monitoring of software applications
9	Raul Fuentes	Secure M2M in Wireless Sensor Network
10	Diego Rivera	Analysis and Influence of Business Parameters on OTT Services
11	Vinh-Hoa La	Security Monitoring for Network Protocols and Applications
12	Jose Alfredo Alvarez Aldana	Distributed Monitoring for MANETs
13	Loukmen Regainia	Security Through Conception and Testing
14	Pamela Carvallo	Detecting threats in cloud environments
